**Gowit Code Review and Improvement Task**

**Objective:**

You are provided with a Go code example that contains several bad practices. Your task is to review the code and make improvements yourself or comment on the parts that need improvement. If you are not familiar with Go, you can consider this code as pseudo-code and provide general comments. Highlighting how you would enhance the performance or structure of the code will showcase your skills and problem-solving abilities.

**Submission Guidelines:**

- Provide your reviewed and improved code in a text or code file.
- Include your comments and suggestions as annotations or in a separate document.
- Ensure your submission is completed within 3 days. If you are unable to find an available time slot to work on this task, feel free to reach out via this communication channel.
